Free Dental Services to be provided at "Give Kids a Smile" Event in Pocatello

To prevent oral diseases in children, Southeastern Idaho Public Health is partnering with Idaho State University Dental Hygiene Department, Pocatello Family Dentistry, and area dentists to provide a free day of dental care. This annual program, Give Kids A Smile, is **by appointment only** and will be held in Pocatello, on **Saturday, February 10th from 9:00 am- 1:00 pm** at the Idaho State University Dental Hygiene Clinic, 999 Martin Luther King Drive (Building #37).

Tooth decay is the most common chronic childhood disease found in children. The social impact of oral diseases in children is substantial. More than 51 million school hours are lost each year to dental-related illness. Pain and suffering due to untreated diseases can lead to problems in eating, speaking, and attending to learning.

Families that have children in need of dental services that do not have dental insurance or have limited access to dental care can call **Dana Solomon at Southeastern Idaho Public Health at 208.239.5256 to schedule an appointment**. If more information is needed, please call April Sluder at 208.478.6314.
